### **DUTIES AND RESPONSIBILITIES**

- Budget oversight: Assists with developing wastewater treatment plant laboratory sampling needs in the operating budget, reviews expenditures from those funds.
- Inventory Control
  - Assists with maintaining adequate inventory of sampling inventory
  - Assists with maintaining inventory levels of all chemicals used in treatment process
- Performance Indicators
  - Assists in reporting of wastewater treated
  - Assists in reporting chemical quantities used
  - Assists in performing calculations for wastewater treated, wastewater bypassed, and sludge produced
  - Assists in reporting and tracking number of wastewater quality samples taken, keeps historic records and results
  - Provides training on lab procedures and protocols to wastewater treatment plant operations staff
  - Be able to perform testing in accordance with industry standards
  - Collect water samples from locations within the plant for chemical and bacteriological testing
  - Collect and analyze water samples to ensure the safe discharges from significant industrial users
  - o Perform analysis of samples under microscope with ability to identify microorganisms
- Environmental Compliance
  - o Assists in providing oversight and conformance to KDHE Monitoring Schedule
  - Assists in monitoring and reporting sanitary sewer overflows and bypasses as they occur to appropriate agencies
  - o Assists with monitoring and complying with the NPDES discharge permit for sludge.
  - Assists with the pretreatment program for industrial users
  - Assists with coordinating, preparing, and updating required documents for pretreatment, septic and grease haulers, and sludge program
  - Works in conjunction with wastewater collections superintendent for reporting of sanitary sewer overflow and reduction of inflow and intrusion reduction
  - Assists with tracking points of origins for haulers
- Personnel Leadership Evaluates chemical tests done by treatment plant operators and the equipment and materials used by the operators
- Contractor/Vendor: Collaboration and Management Deliver samples to analytical laboratories and follow up on the tracking of results.

#### **POSITION COMPETENCIES**

# **Budget Oversight:**

• Understands cost of components and materials used in sampling process

- Identifies area of potential year to year expense increases or decreases, and/or potential onetime costs
- Understands cost associated with third party sampling analysis

# Inventory Control:

- Knowledge of standard volumes or packaging of delivered product to maximize efficiencies and economies of scale
- Understands shelf life of inventory kept on hand, including first in first out philosophy
- Understands auditing and accountability for inventory

### Performance Indicators:

- Understand Supervisory Control and Data Acquisition Systems (SCADA). Ability to maintain system functionality and accuracy of data collected. Understands trend charts and makes necessary adjustments to process as needed
- Ability to prioritize multiple and changing work requests while meeting the many needs of the customers/users
- Ability to quickly assemble, formulate, and provide statistical data with reference to base line information
- Provides oversight in performing laboratory tests and other laboratory work
- Ability to make mathematical computations for lab work summaries and statistical analysts
- Expert knowledge of laboratory principles, techniques, terminology and equipment

#### **Environmental Compliance**

- Accrues knowledge of regulatory and permitting issues and time frames.
- Assists in reviewing, questioning, and commenting appropriately concerning draft permits or regulatory review processes
- Stays current on environmental regulations

# Contractor/Vendor: Collaboration & Management

- Knowledge and understanding of vendor contracts; performance expectations, terms and conditions
- Ability to help prepare technical requirements for vendor contracts.
- Maintains positive professional relationship with contractors working on site or vendors who deliver product

# **EDUCATION**

- Bachelor's Degree in Biology or Chemistry is preferred.
  - Associates degree or equivalent trade school certificate and 5 years of relevant work experience
  - High school graduation or equivalent and 7 years of relevant work experience
- Work to obtain certification of supervisory or personnel leadership training
- Work to obtain certification in:

- o ABC (Association of Boards of Certification) Laboratory Tech
- ABC Biosolids
- NELAC (National Environmental Laboratory Accreditation Conference)
- KDHE Wastewater Treatment Operator class 4 certificate.
- Utilize Memberships and Trade Affiliations with organization such as the following for industry updates and or continuing education opportunities
  - American Water Works Association
  - Kansas Rural Water Association
  - Kansas Municipal Utilities
  - American Public Works Association
  - Water Environment Federation
- Proven knowledge of understanding of the need and use of tools and equipment to perform the work
- Other certifications and training requirements:
  - Occupational Safety and Health Administration 10 hour
  - Cardiopulmonary Resuscitation Training
  - First Aid Training
- Must maintain a Kansas Commercial Driver's License Class A
  - Air Brake Endorsement
  - Tanker Endorsement
  - Automatic Transmission may be required optionally
- Ability to utilize smart phones, tablets, and computers for communicating, corresponding, and processing of work tasks
- Proven ability to process and utilize asset management systems for handling work requests and work order management
- Solid written and verbal communication skills with the ability to effectively communicate and interact with all levels of personnel within the city and the general public in a positive and cooperative manner
- Ability to present to staff and/or groups and convey ideas and facts orally using the language the audience will best understand
- Ability to read and interpret design drawing and specifications including: plan and profile drawings, elevations, contours, navigate to drawing details, review specifications for city standard conformance
- Ability to maintain a valid driver's license
